Lancaster Farming

VOL 5 NO. 39 — Lancaster, Pa., Saturday, August 20, 1960 — $2 Per Year

LEADING HER GRAND CHAMPION ANGUS STEER at the Garden Spot Baby Beef Club show on Wednesday is Rhoad Mast, daughter of Mr. and Mrs. Jacob K. Mast, Elverson R1 The 19 year old graduate of the Lancaster Mennonite School led the Virginia born calf to the top award after winning him by drawing straws with a brother and sister for ownership of three calves in the pen. "Ted" weighed in at 935 pounds and topped the sale at $63.00 per hundredweight. —L. F PHOTO

Beef Show Champion Exhibited By Rhoda Mast

A pretty 18 year old lass nudged a chunky, black 935 pound angus steer to the grand championship over 64 other beef animals at the Garden Spot Baby Beef show and sale at the Lancaster Union Stockyards Wednesday.

Rhoda Mast, daughter of Mr. and Mrs. Jacob K. Mast of Elverson R1, showed Ted, an angus from a farm in Virginia, to the top spot to beat out a Lancaster County bred angus ebhibited by Wil-

Farmers Reminded Of Date Of Conservation Field Day

Amos Funk, chairman of the Lancaster County Soil Conservation District Directors reminded farmers this week that the district will hold its first annual field day on August 24.

Participants in the first conservation field day ever attempted in the county will see one of the most nearly perfect conservation farms in this part of the state according to Martin Muth, Work Unit Conservationist with the Soil Conservation Service.

Programs lrawn up by field day chairman Garland Gingerich, include tours, exhibits and discussion to explain the work of the agencies cooperating with the local SCD.

Wagon tours over the farm at 11 a.m. and 1 30 and 2:30 p m. will give visitors an opportunity to see what soil conservation practices can do on the farm, Gingerich said

Vo-Ag Teacher To Receive HonoraryDegree

A local teacher of vocational agriculture has been named by the National Association of Future Farmers to receive the Honorary American Farmer Degree at the annual convention of the group on October 12.

George W. Myers, teacher at the Lampeter - Strasburg High School for the past 11 years, is the only teacher

GEORGE W. MYERS

from the Keystone State to be so honored this year, according to information from George Derr, assistant state advisor of the FFA. Only 15 teachers are selected annual-

Ferguson Is Top Guernsey Judge

The title of champion Guernsey judge was given to a Kirkwood R1 dairyman on Thursday as the county Guernsey breeders held their annual field day and cattle judging contest.

Hervey R. Ferguson, owner and operator of Walnut Grove farm, scored 283.3 of a possible 300 points to take the honors in the men's division as well as the overall scoring championship.

High score in the women's division of the contest was the 250 points amassed by Mrs. Raymond F. Witmer, of Willow Street R1.

In the division of the contest for boys and girls under 16 years, Miriam Graybill of New Providenie R1 led the field with a score total of 233.4.

Finishing in a tie for second place in the judging were Raymond D. Huber, of Lancaster R7, and John A. Breneman, Willow Street R1 with scores of 266 7. In a close race and tie for fourth place were Clarence Harnish, Lancaster R7 and Robert Mumma, Landisville with scores of 266 6.

Other scorers in the women's division were Mrs. Snavely Garber, of Willow Street R1, 216 6; Mrs Elam

Best Of Class Wins To Five Gardeners

Five rosettes were carried off by as many county 4-H members for best of class wins in the flower and vegetable roundup held Tuesday afternoon in the Neff School, Leffsville

Girls scored wins in the outdoor flower, indoor flower and sweet corn classes while boys took the honors in the canning tomatoes and vegetable classes.

Judy Buckwalter, a first year member in 4-H, exhibited three varieties of Zinnias in addition to a mixed bouquet of outdoor flowers to claim the purple ribbon. Judy, the daughter of Mr. and Mrs David Buckwalter, Lititz R3, is also a member of the home ec sewing club.

The rosette in the indoor flower division went to Kathryn Shrom, daughter of Mr and Mrs Edgar Shrom, Manheim R4 The Judge, Ralph Pearson, assistant county agent of Montgomery county pointed out the entry of Miss Shrom as an example of a near perfect wax begonia.

John Hess, son of Mr. and Mrs. David Hess, Marietta R1, won the best of class award with his canning tomatoes, while Nancy Nestleroth, daughter of Mr. and Mrs. Carl Nestleroth, Manheim R3 carried away the honors in the sweet corn division. Nancy won first in indoor flowers last year and

Local Farmers May Exhibit In Hay Show

Lancaster County farmers who would like to exhibit a sample of hay in the Southeastern Pennsylvania District Hay Show next Thursday, Friday and Saturday will not have to make the trip to Hershey, according to M. M. Smith, County Agricultural agent.

"If the exhibitor will bring his hay to the Lancaster County Farm Bureau building on the Dillerville Pike by 8 00 a m. August 25, we will see that it gets to the show," Smith said.

Exhibitors must attach an entry blank giving name, address, county, section and class in which the exhibit is to be entered, but the blanks will be available at the Farm Bureau for those farmers who have not received them prior to bringing samples in

According to official rules, an exhibit will consist of a bale section approximately six inches thick, or an equavilent amount if cut from the mow. The hay must

Lampeter Fair Holds Barbecue

A Chicken Barbecue was held for the families of the West Lampeter Fair Directors on August 17, with 95 persons present

Mr. Wayne B. Rentschler, the last Charter member of the board to leave, was presented with $50 cash award as a token of appreciation for his many services rendered in the past 31 years.

Announcement was made that the fair is to be held on September 28, 29 and 30th. Books are being published and distributed.

The fair is open for large display of farm exhibits.

FIVE - DAY WEATHER FORECAST

Saturday - Wednesday

Temperatures for the next five days are expected to average near the normal range of 63 at night to 83 in the afternoon. Little change in temperature is expected over the weekend but warming is expected the first of the week. Rain amounts are expected to average between 1/4 and 1/2 inch occurring as showers about Sunday.

At Lancaster Yards

Market Slow and Down 50

CATTLE 3625 compared with 2925 last week Supply includes 50 percent slaughter steers and 40 percent stockers and feeders Trading was slow on all classes Compared with last week's close, slaughter steers were 25-50 lower Cows 25-50 higher. Bulls steady Stockers and feeders weak

Three loads high-Choice & Prime 1075 1359 lb slaughter steers sold at 27 00 and Good grade 23 50-25 50 with Standard selling at 21 00-23.-50.

Cutter and Utility cows 15 25-17 50, Canners and low Cutters 13 75-15 25 Utility and Commercial bulls 19 00-22 00, Good grade fed bulls 22.00-25 00.

Medium and Good 750-1050 lb feeder steers ranged from 21 50-23.50, load 1100 lb Good also 21 50, Good to low - Choice 23 00-25 50, Common and Medium 450 - 600 lb stock calves 20 00-22

CALVES 650 compared with 550 last week Trading moderately active Vealers steady Good and Choice vealers sold for 26 00-31 00, Choice and Prime 31 00-34 and several 35 00, Standard and low-Good 20 00-26 00, Utility down to 17 00.

HOGS 1500 compared with 1600 last week. Trading slow Barrows and gilts 25 lower than last week's close Sows steady. U S 1-2 190-220 lb barrows and gilts 19.-20., few lots mostly No. 1 brought 20 00-20.50, 1-3 190-230 lb. butchers 18 50-19.00 with No. 3 selling at 18 25. 230-250 lb. hogs 18 00-18.50. U. S 1-3 grade 300-600 lb. sows 12 00-15 00.

SHEEP: 450 compared with 400 last week Trading moderately active Spring slaughter lambs steady. Good and Choice 75-95 lb. spring lambs made 20 50-22 00 and a few lots Choice and Prime sold at 22 00-23 00, few lots 60-69 lbs. made 16.50-17 00.

KEEP EGGS CLEAN

Two or 3 inches of clean dry shavings in nests in the laying house help prevent breakage and keep the eggs clean F H. Leuschner, Penn State extension poultry specialist, suggests frequent gathering to keep eggs clean. Wiring the droppings boards helps keep both hens and eggs clean.

Delmarva - Georgia

Slanghter And Prices Steady

Delmarva reported prices of 16.40 to 17.80 for 802,700 head at farms during the 24 hour period ending 10:30 Friday morning.

Estimated slaughter by eastern shore processors for the week end is 685,000 head compared to the 668,000 head last week end

The Delmarva broiler feed ratio for the week ending August 12 was down two points from the previous week to 3.8. Broilers averaged 17.10 and mash cost $90.-74 per ton. For the corresponding week a year ago the ratio was 3.3 when broilers sold for 16.48 and mash cost $98.91 per ton.

Fluid Milk

Good Pastures Push Supplies

In most all areas production was generally well maintained to slightly higher Only in instances were slight declines noted Relatively good pasture conditions contributed to a well maintained milk flow for this time of year.

Bottling demand was no more than fair and generally disappointing in most instances. As a result of contra seasonal supplies offerings were adequate to in excess resulting in an unusual

BURLING'S CHICKS For Top Quality Eggs

At NEPPCO Shows, our egg quality has been highest among all entries. These were hen eggs — after they had been laying 12 to 14 months. That's when Quality Eggs pay best.

At Bill Burling's you can find just what you want.

You have eight top strains and crosses to choose from. Our Sexlinks are very popular with nearby farmers.

Then there are the "pick" of the best strains and crosses for Broilers, or meat-and-eggs.

One customer said our Carey Leghorns are : "Just wonderful birds to handle". That's **important** in high-powered Leghorns.

Burling's Big 8

Carey's Famous Random Sample Test-winning Leghorns A customer made a 270-egg average on 1800 birds!

Merryknoll Sexlink (Rock x Red)—Bred by electronic "brain" methods.

Golden Sexlinks — Harco male x Andrews White Rock female. They're tough, and great layers.

Cobb's White Rocks — Broiler Test winners and good layers too.

Vantress x Cobb White Rocks — Popular for meat.

Garrison Cornish Male x Cobb White Rock female Super meat quality.

Gove's Barred Rocks Still a favorite of many farmers.

Burling's New Hampshires. Carefully selected stock.

FROM WHERE WE STAND -

Food Fads Versus Food Facts

Governor David L. Lawrence recently announced the appointment of a commission to draft a Pennsylvania food, drug and cosmetic act.

We feel this is a wise move. There has been a great deal of discussion of the use of chemicals in food production. Some of it has been of a 'scarce' nature. Numbers of people, no doubt, have been lead to believe that basic foods, such as meats and vegetables, are actually being poisoned.

Adjutant General Maj. Gen. A. J. Biddle, Jr., will head the State Commission, composed of public members as well as experts in the agriculture and public health fields. The commission will have the job of reviewing all existing state food, drug and cosmetic laws now in force and recommending new legislation to meet present day needs.

Governor Lawrence said in announcing the appointment of the commission, "Pennsylvania has been a leader in pure food legislation starting in colonial days."

The Governor went on to point out that changes in food processing and handling makes some of the existing legislation outmoded. The commission has been asked to suggest changes in legislation to bring regulations up to date with the changes which have come about in the last decade.

Despite a bombardment of food fads and all sorts of schemes to combat cancer and other ills supposedly caused by faulty foods, Americans still believe that good sound and solid food spell solid nutrition.

Homer Davidson, president of he American Meat Institute said recently, "The food supply of the nation is good. It deserves public confidence."

Other leaders in the fields of foods and nutrition share this view. Dr. Charles Glen King, executive director of the Nutrition Foundation says, "No nation in history has had for its entire population a food supply that would compare with our present supply in terms of nutritive value, safety, convenience, stability, variety, attractiveness and economic availability for everyone."

Dr. M. R. Clarkson of the U. S. Department of Agriculture says, "The laws enforced by the Department of Agriculture and the Department of health give effective protection to the public."

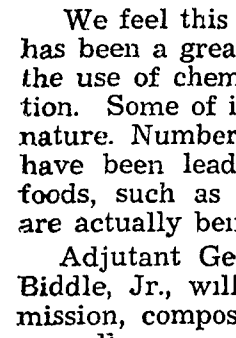
Dr. Frederick J. Stare of Harvard states, "As a physician and student of nutrition for the last 25 years, I should like to state categorically that I do not know, nor have I ever heard, of one single case of ill health that has been shown to be due to the addition of approved additional chemicals to foods."

Regulatory agencies have done a good job in the past and we have confidence that they will continue to do a good job of protecting the nation's food supply with or without the harangues of food faddists and cranks.

So you can eat those succulent steaks, nutritious and delicious dairy and poultry products, and those appetizing dishes of vegetables and fruits without worry.

At least that's how it looks from where we stand

More Americans will die this year from insect stings than from snake bites, according to an article in Today's Health, the American Medical Association's magazine. Most medical authorities are convinced that severe reactions to stings are the result of an allergy. The insects that cause most of the reactions are the honey bee, the bumble bee and three kinds of wasps —yellow jackets, hornet and Polistes. Dr.



Davidson

Cocktail Diplomacy

It is time we in America face some hard, unpleasant facts, and that we make up our minds what we are going to do about them

Communism and the communist totalitarian form of government have been accepted by, or imposed upon, almost half of the people of the world Our Free World is growing smaller almost day by day

Democracy is in trouble, serious trouble, in many parts of the world. In no time in recorded history has there been so much world-wide unrest, turmoil and conflict during a time of "peace."

Christianity faces a challenge such as it has not known since persecution by the Romans almost twenty centuries ago Communists deny and ridicule the teachings of Christ as vehemently as did the Romans.

If democracy is crushed, then Christianity will surely die There is no freedom of religion under a communist dictator, nor does communism recognize any of the other basic freedoms of a democracy.

Spread of Marxism

Half a century ago Karl Marx, author of the communist "bible," developed a program for world conquest from which his successors have never deviated It was, and is, a diabolical plan of deceit, dissension and subjugation to discredit, then destroy democracy and individual freedom

Communist dictators don't want a military war for the simple reason they believe they can conquer the world without firing a shot. But, neither do they want peace, as we understand it, in the world There is no sincerity to their talk of "peaceful coexistence"

Russia and Red China will start a shooting war only if and when they become convinced that communism cannot conquer the world by other means Let us hope, then, that we are not goaded into a "hot" war out of despair of winning the "cold" war

For the Minds of Men

World War III is a struggle between communism and democracy for the minds of men It is an ideological battle waged with words in a propaganda war in which we have, so far, been almost entirely on the defensive

Events of the past few months have brought into frightfully clear focus the deterioration of United States and Free World prestige in many areas of the world. We need to re-examine very closely many of the programs which make up the bulk of our basic foreign policy.

We have largely followed a program of cocktail and dollar diplomacy to win the support of governments. We have, in short, attempted to buy friends with military assistance and generous economic aid.

The communists, on the other hand, have been disturbingly successful in overthrowing many of those governments by infiltration into student and labor groups. They live with and work with people while many of our diplomats give lavish cocktail parties to entertain government officials

The record in Turkey, South Korea, Cuba, Japan and, more recently, the Congo should convince us that it is time to reevaluate and revise our foreign policies and programs The survival of

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY DR. KENNETH J. FOREMAN

Bible Material: Isaiah 5 1-24.
Devotional Reading: Romans 13 3-14.

After the Drinks

Lesson for August 21, 1960

THE BIBLE says not a word against whiskey. The reason is the same as the reason why it does not warn against too-fast driving, or the excessive use of sleeping pills, or flying a light plane in freezing rain. These are all ways of cutting life short, just as whiskey is. But the Bible does not mention them because they had not yet been invented. The Bible does warn us many times about the use of wine and the equivalent of beer. Most of the references to "strong drink" could be translated "beer" without seriously changing the meaning.

Dr. Foreman

Death

The prophet Isaiah, looking about him in his own city of Jerusalem, saw a drinking people, men and women for whom social drinking was a well-established, popular habit. But he did not like what he saw. Furthermore, since an authentic prophet is one who sees with God's eyes, we can be sure, if we take the Bible seriously, that God did not like it either

Does God like it any better in America? In 1958, the last year for which figures are available, the sales of liquor stores were $4,439,000,000. This is just about double what the public spent in shoe stores in the same year.

Liquor advertising accounts for some of this, to be sure. But liquor ads—very attractive they are, too—always show the liquor-drinker before the drinks, never after They never show the murders committed under the influence of alcohol, they do not show the wrecks caused by drinking (not necessarily drunk) drivers The ads show a man—before; they do not show him after his drinks have made him less than a man. "The grave has opened its mouth," Isaiah said, ref... his hard-drinking nati... grave opens its mouth t... not to mention the liv... of alcoholism

WEEDS

By: Carol Dean Huber

Hoeing in my garden, digwing out the weeds,
I have to start hoeing when I plant the seeds
Morning Glory, red root and crab grass I know
Would take all the food my plants need to grow.

So it is with bad thoughts growing in my mind,
Envy, hate, greed, and things unkind
I'll uproot them—kill them as I should
Before they grow big and smother out the good

Gardeners

Swine Backfat Probing Comes To County Farm

Backfat probing, one of the newest tools in the swine industry, was used this week to help a Lancaster County farmer have his herd of pure bred Landrace gilts certified as meat type individuals.

Backfat probing, as the name implies, it a method of measuring the thickness of the back fat on the body of a living hog. The eye of a good judge can estimate the amount of fat on the back of a hog, but even the most trained eye is not accurate enough to select breeding animals which will transmit to their offspring the ability to turn feed into red meat instead of fat.

Measuring the thickness of the fat on the 10 six month old gilts on the Bird-In-Hand R1 farm of Elam Reiff, Jr. was John Wolgemuth. Asst. Manager of the Lancaster County Farm Bureau, Inc.

The backfat probing, developed and tested jointly by the U. S Department of Agriculture and several state university experiment stations, is a practical method of measuring the amount of fat on the body of a hog without slaughtering the animal.

In early certification studies, litter mates of breeding stock were slaughtered and the backfat thickness was entered on the record of the retained stock.

The ten registered Landrace gilts used in the Lancaster County probing trials were purchased from the Willow Tree Farm at Nobleville, Indiana and were out of meat type certified sire and dam.

Farrowed on February 1[illegible] and 15, the gilts weighed ar average of nearly 200 pound. with the lightest one over 180 pounds at the 180 and 182 day mark.

Probing is a fairly simple operation and does not cause any undue injury to the swine A small slit is pierced in the skin of the animal a three locations along a line three inches from the back bone The first probe is taken at a spot just behind the shoulder, the second just above the first rib, and the third just in front of the ham

After the slits have been made in the skin, a small steel ruler is inserted into the opening and pushed thru the fat When the ruler touches the muscle tissue the reading is taken and disinfectant is applied to the incision.

An average of all three readings is recorded, along with the weight of the gil on her application for mea certification.

At the Reiff farm, the highest reading was a backfat thickness of 1 3 inches while the lowest was 0 9 inches with no average under one inch and no average over 1 3.

According to Dwight Younkin, Extension Swine specialist from Penna State University, the ideal for breeding gilts of this age is 200 lbs. of weight and between one and one and three tenths of an inch backfat thickness

PROBING TO FIND THE THICKNESS OF BACKFAT on a six months old purebr Landrace gilt is John Wolgemuth, assistant manager of Lancaster County Farm Bure A slit is cut in the skin of the gilt and a small stainless steel ruler pushed into the along the gilt's backbone The thickness of the backfat indicates the ability of t hog to turn feed into red meat rather than fat Backfat probing is one of the steps certification of meat type swine. The probing was done on the farm of Elam Reiff, J Bird-In-Hand R1 —L F PHO

Reiff, beginning in the purebred Landrace business about three years ago, sells breeding stock in sales twice a year at Blue Ball and at the state Landrace sale at Harrisburg Formerly in the present herd sire from the herd of Don Koch, Latmer, Yorkshire business, Reiff believes that Landrace are a faster growing, leaner breed than any others he has tried Last year, Reiff bought his Iowa The sire of the Re boar is out of the world r ord litter of Landrace swi Reiff swine will have fluence in the swine herds

NEW TRACTORS COMING!

Yes, the rumors are true that John Deere will soon be announcing a new line of tractors. We'll be previewing them at "Deere Day in Dallas" August 30. What's more, we've been told that these new tractors represent an amazing leap forward in power farming—an advance so progressive that it sets an all-new high in tractor performance, ease of handling, and operator comfort. Watch for our announcement date when we return from Dallas. We are looking forward to showing you firsthand what these tractors are going to mean to you in greater production, lower labor costs, and more leisure time.

the county and state, but their influence will be felt in foreign countries as well Recently a boar and gilt from the herd were sent through the Heifer Project to Monrovia, Liberia

By crossbreeding his grade sows and culling them out as fast as practicable Reift plans to run a herd of 30 purebred Landrace sows. During the past spring he weaned an average of 9½ pigs per litter from all his sows During February one of his Landrace sows farrowed 19 pigs and another farrowed 18.

Assisting Wolgemuth with the probing operation were Farm Bureau fieldman Harold Geib, Melvin Koser and Charles McCrabb

Peaches, Tobacco, Hay Crops Are Being Harvested Now

Peaches are available in all areas of Pennsylvania as picking of early varieties started in northern counties, the State Crop Reporting Service said this week in its weekly crop and weather summary.

Peach quality is generally excellent and the fruit has good color, the State Department of Agriculture agency added.

In reviewing other farm activities, the Service said that warm days with plenty of moisture from the previous week boosted corn along. Late planted tobacco fields also made excellent growth during the warm days

Fall plowing is in full swing in southeastern and south central Pennsylvania Wheat harvest is virtually completed except in the northwest while oats harvest is proceeding rapidly toward a finish in the north.

Hay making continues when the weather permits The second cutting of alfalfa hay is nearing completion with the third cutting getting started in the southeast. Alfalfa hay quality is considered fair to good.

Late summer potatoes are being dug in moderate volume in southern counties The fall potato crop is in good condition and maturing rapidly with only a small a-

(From Page 1)

teachers and high school principals, how he had cared for the purebred gilt awarded to him last year He explained that the gilt has now farrowed a litter, and one of the young pigs has been passed on to another boy in the FFA chapter to continue the swine ring.

Toastmaster at the Hotel Brunswick was Mark W. Anspack, Representative, of Sears Roebuck Foundation, donor of the awards.

Donald H. Gareis, also representing the foundation, said the swine program has been conducted for the four counties, Lancaster, Adams, Franklin and York for 17 years. Each year a $25 00 bond is presented to one boy in each chapter for outstanding accomplishments in his swine program and an additional $50.00 bond goes to one boy in each of the four counties in the area.

Chapter winners in Lancaster county were John W Brubaker, Warwick; Dale E. Myer, Solanco; Larry J Shenk, Manheim; Glenn B Shultz, Penn Manor; Larry E. Keith, Cocalico; Earl H. Livingood, Lampeter - Strasburg; Larry Brubaker, Donegal, and John Eby, Pequea Valley

ers, the group ate their dessert of watermelon and set tled down for a "peaceful" night's sleep

About the time the group was ready to drift into the land of slumber, the rain began to descend. As it rained harder and harder, most of the campers followed Mrs Overgaard to her warm welcoming house for the rest of the night.

The other girls, under the guidance of Miss Denlinger, a junior leader of the club, decided to brave the storm through, only to be completely washed out in about another hour. After giving up their attempt, the last of the girls started for the Overgaard house, only to realize they were lost in the woods. After about another hour, the drenched girls reached the shelter of the Denlinger home at 602 Enfield Drive where they spent the night

At the next meeting, scheduled to be held at the same place, each Krazy Kamper is requested to bring a friend, the reporter, Miss Denlinger, said

PURSUING THE PATH OF PROGRESS

Subject: New Broiler Feeds

After 2 years of research and very extensive testing, our Nutrition Department announces that our NEW IMPROVED EARLY BIRD BROILER RATIONS are now available to all growers.

● WHAT IS DIFFERENT ABOUT THESE RATIONS?

1. A DIFFERENT and MORE EFFICIENT balance of the amino acids.
2. A SUBSTANTIAL INCREASE in the energy value.

● HOW WILL THESE RATIONS PERFORM?

With these rations LESS FEED per lb. of live weight broilers will be required.

Field tests would indicate an average 5% improvement in feed conversion.

The grower who has been getting conversion in a range of from 2.30 to 2.40 can with equal manage- and enviromental conditions expect meat feed ratios of from 2.20 to 2.28.

● HOW ABOUT PRODUCTION COSTS?

Since these changes involve no increase in Early Bird feed costs the net result will be a SUBSTANTIALLY LOWER COST PER LB. OF BROILER MEAT PRODUCED.

● WHAT ABOUT FUTURE DEVELOPMENTS?

An additional change in Early Bird broiler ration, which we think will be helpful and constructive has recently been cleared by the Food and Drug Administration.

Final testing on this is now being conducted by our Nutrition Department.

If upon completion of these tests we are 100% certain of the value of this change it will also be put into effect.

Sincerely yours,

EARLY BIRD

Summer Vegetables

by Mrs. Richard C. Spence

SQUASH — All during the summer food markets and gardens abound with many varieties of squash — the flat, white, disk-shaped type known as pattypan or cymling, the yellow crooked or straight necked type, the green or green striped varieties known as Italian or Zucchini and smooth-skinned dull yellow, orange-fleshed type known as butternut.

Summer squash are usually picked before fully mature, when seeds and skin are tender. The whole squash can be cooked without peeling or other waste So the skin should be clean and free from blemish, easily pierced with the nail Overripe squash have a hard rind, hard seeds and fibrous flesh

Squash should be steamed, never boiled. First wash the squash well, cut in slices or cubes and place in saucepan with just enough water to cover the bottom of the pan Cover tightly and steam for 5-10 minutes

Cooking squash in a pressure saucepan is ideal Use a half cup water, and cook squash, sliced or diced, at 15 pounds pressure for two and a half minutes Squash can be served as is with salt, pepper and butter or mashed with hot milk or cream and seasonings added.

There are many other ways to cook and serve squash — dipped in egg and crumbs and fried, stuffed and baked, brushed with butter and broiled indoors or on the outdoor grill. For added flavor squash can be combined with cheese, onion, onion with sour cream, tomatoes, or other vegetables such as lima beans or green beans.

Whole baby pattypan squash are delicious when lined up on a long metal skewer and cooked over hot coals on an outdoor grill. Brush with butter or barbecue sauce and keep turning until golden brown on the outside and tender inside. Slices of any summer squash team up nicely with meat-cubes and other vegetables when cooking kabobs on your grill.

You can use any kind of summer squash in these recipes:

BAKED ZUCCHINI AND TOMATOES

2 medium-sized zucchini
2 medium sized tomatoes
2 medium-sized mild onions
Salt and pepper
Butter or margarine
1 cup buttered crumbs

Wash the zucchini; do not peal it unless the skin is hard. Peel the tomatoes and the onions. Slice the vegetables into very thin crosswise slices. In a greased baking dish make alternate layers of zucchini, tomatoes, and onions, sprinkling each layer with a little salt and pepper and dotting with butter or margarine. Spread the top with buttered crumbs. Bake in a moderate oven (350 degrees) until the vegetables are tender. Serves 4.

* *

SQUASH MEDLEY

Eight squash (use little yellow, white and green squash and you'll have a charmer.)

Filling:
1 large red or green pepper, chopped
3 medium to large ripe tomatoes, chopped
2 medium onions, chopped
3 slices bacon, chopped
1 (8 ounce) package process cheese, shredded
1 teaspoon salt
¼ teaspoon pepper
Fine dry bread crumbs
Butter or margarine

Parboil squash (zucchini take about 3 minutes; yellow crooknecks or small white pattypans, 5 minutes; and white scallops, 15 to 20, depending on size) Cut zucchini, crooknecks and pattypans in half; cut top out of scallops. Scoop out seeds.

To make filling, combine remaining ingredients except crumbs and butter. Mix well. Spoon into each squash. Top each with bread crumbs and dab of butter. Bake in hot oven (400 degrees) 20 minutes. Makes 6 to 8 servings.

* * *

We like sharing our peak of the summer's pick with neighbors and friends. And this year when we give our seasonal gift, we are going to include this recipe for Summer-Garden Medley with a little note that says "For your eating pleasure" Your friends are sure to be delighted, too. Why not try it and see.

SUMMER - GARDEN MEDLEY

1 9-oz. package frozen green beans or
1½ cups fresh green beans
1 large tomato; cut in wedges
¼ cup chopped green onion
¼ cup chopped green pepper
2 teaspoons sugar
¼ teaspoon ground cloves
1 bay leaf, crumbled
½ teaspoon salt
Dash of pepper
¼ cup (½ stick) butter

Cook green beans til slightly tender; drain, Add tomato, green onion, green pepper, sugar and seasonings, dot with butter. Stir lightly with a fork and cook over medium heat 10-15 minutes, until tomato is tender. Serve immediately.

There's a bit of "Jiggs" in ...ost of us when it comes to ...orned beef and cabbage. The flavor of luscious corned beef brisket and succulent cabbage combine in a way that is hard to resist.

Homemakers on the lookout for out-of the-ordinary food items have discovered the interesting variety corned beef brisket lends to menus. Corned beef brisket comes in family-sized packages weighing from two to five pounds. These transparent packages are vacuum-sealed to retain all of the meat's goodness until it reaches your table. You can also buy whole briskets of corned beef weighing from five to fourteen pounds.

For a truly filling, flavorful treat, serve a corned-Beef-Vegetable Skillet with Mustard Sauce for dinner soon. If your family likes corned beef and cabbage, they'll love it in this intriguing combination of spices & flavorings.

CORNED BEEF-VEGETABLE SKILLET WITH MUSTARD SAUCE

1 to 2 pound piece Corned Beef Brisket
2 tablespoons butter or margarine
1 small head cabbage, shredded (5 cups)
½ cup chopped celery
½ cup chopped green pepper
¼ cup water
1 tablespoon butter or margarine
2 eggs
¼ cup vinegar
½ teaspoon salt
1½ tablespoons sugar
½ teaspoon dry mustard
⅛ teaspoon paprika
¼ cup water
¼ cup cream

Cook brisket according to directions on package. Drain Slice brisket. Melt 2 tablespoons butter in a skillet. Add cabbage, celery, green pepper, and water, Cover and cook over low heat five minutes. Top with slices of corned beef. Cover and continue cooking until meat is hot and vegetables cooked, 5 to 10 minutes. Melt 1 tablespoon butter in a saucepan. Add eggs beaten with vinegar, salt, sugar, dry mustard, paprika, and water, Cook over low heat, stirring until thickened. Remove from heat. Add cream. Beat until smooth. Serve this sauce hot over corned beef-vegetable skillet. 4 servings.

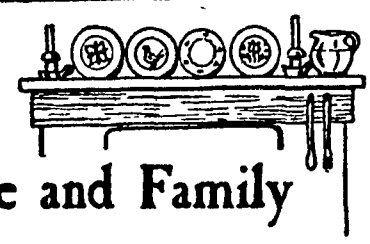
For the Farm Wife and Family



BEAN NESTS FILLED WITH MIXED GARDEN VEGETABLES

10 ounce package (or about 2 cups fresh) French style green beans.
10 ounce package (or about 2 cups fresh) frozen mixed garden vegetables
Salt and pepper
½ cup condensed cream of mushroom soup
1 tablespoon flour
8 slices toast

Cook green beans and mixed garden -vegetables separately. Season mixed garden vegetables. Mix the soup and flour together in a saucepan. Boil 5 minutes, stirring constantly. Remove from heat and add drained green beans Mix well. Cut toast, using a cutter 2¾ ins. in diameter. Form a nest with green bean mixture on top of each toast circle. Fill nests with drained mixed garden vegetables. Just before serving heat assembled nests in a hot oven (400 degrees) 10 minutes. Serve immediately.

* *

BAKED HERB SEASONED TOMATOES

6 medium sized tomatoes
Fine dry bread crumbs
Salt and pepper
Marjoram or dill weed
Butter or margarine

Cut each tomato in half but do not peel Arrange in a low-sided baking pan. Sprinkle about 1 teaspoon of crumbs on each. Season lightly with salt and pepper and a pinch of leaf marjoram or dill weed, whichever your herb shelf has to offer. Dot each tomato half with a half teaspoon or so of butter. To bake place in a hot oven (400 degrees) for 10 minutes.

Best Food Buys

Nearby Foods Are At Peak

Nearby growing areas are providing foodshoppers with a wide selection of fresh fruits and vegetables, reports Tom Piper, Penn State Marketing Agent Quality is at it, peak for most produce items; local harvest means less time required for transportation and more commodities can be ripened in the field

Peaches are stealing the scene at fruit counters Sun High and Triogem varieties top the popularity poll and are good for canning or freezing Hale Haven, Slappy and Fair Haven varieties are currently available with first marketing of the Belle of Georgia white peaches getting underway. Locally grown Rambo apples, nectarines and plums are available at reasonable prices

Locally grown cantaloupes are making their initial appearance at the food market Recent rains have influenced keeping quality. In selecting a cantaloupe, pick one with a rough netting over a yellow base color; a smooth netting over a green base color indicates poor quality. The presence of a stem is a further indication of poor quality Watermelons are in bountiful supply and the quality is excellent

Vine ripened tomatoes and freshly pulled sweet corn head the list of popular vegetables now available at bargain prices. Potatoes, cabbage, green and lima beans, lettuce, peppers, squash, egg plant and salad greens share similar good buy positions

Spotlight at the meat counter will center on the broiler-fryer Plentiful supplies of lamb make this item a good buy Prices on beef and pork cuts are generally unchanged from a week ago

● Vegetables

(From page 9

you're one who likes something hot at each of your meals, you could serve rolls that have been warmed briefly in the oven or a hot vegetable along with the salad. Crisp relishes, a cold beverage and ice cream for dessert could fill in the rest of this most appealing warm weather menu.

DEVILED HAM MOLDED SALAD

1 envelope unflavored gelatin
½ cup cold water
1 cup cream style cottage cheese
1 can deviled ham (4½ ounces)
⅓ cup mayonnaise
2 tablespoons lemon juice.
1 cup evaporated milk
1 cup finely chopped celery
½ cup sweet pickle relish
¼ cup chopped pimento

Sprinkle gelatin over cold water and let soften about five minutes, then dissolve by placing cup in a saucepan with a small amount of water over low heat Blend cheese with deviled ham, mayonnaise, lemon juice and evaporated milk Stir in gelatin mixture Chill until mixture begins to thicken Fold in celery, relish and pimiento. Ladle into eight ⅔-cup well-oiled individual molds. Chill until set, about 2 to 3 hours. When ready to serve, unmold on lettuce. Makes 8 servings

● Hay Show

(From page 1)

have been produced by the exhibitor during the 1960 season No entry fee will be charged

Judging of the hay samples will begin at 1 p m. on Thursday, August 25th, in Hershey stadium, and all exhibits will be destroyed at the close of the show

Fresh Vegetable Market Report Is Available

Expanded Market News coverage for fresh vegetables now covers this area of Pensylvania, reports Tom Piper, Penn State Marketing Agent Tomato, sweet corn and cabbage growers can be better informed of market conditions.

Local growers can receive a daily market news release free of charge simply by having their name placed on the mailing list To do this, write to the Fruit and Vegetable Market News Service, 604 U. S. Custom House, Philadelphia 6, Pennsylvania Ask for the "Miscellaneous Fruit and Vegetable Report"

Pricing is a real problem for the market produce grower, says the Extension Marketing Agent Since the best quality produce is generally sold in the country, it is important that growers be well informed Buyers are always well posted on prices; growers need to be equally well informed

The new market report will list prices received at the farm by growers throughout Eastern Pennsylvania It will also show the national daily supply situation, in car lot equivalents, for 38 major cities plus the source of these supplies This will keep all growers posted on conditions in competing areas - a valuable aid to local growers

In bargaining to determine prices, those best informed seem to have the advantage

● Beef Show

(From page 1)

bur Hosler, son of Mr. and Mrs. Mark Hosler, Manheim R3.

The Hosler entry, a 985 pound steer from the family herd, was a paternal half brother to the grand champion steer at the 1960 Pennsylvania State Farm Show.

For the first time in many years the champion steer in the show was bought by a county butcher when Kunzler and Company paid 62 cents per pound for the top entry.

County residents will have a chance to eat some of the reserve champion as well. Cross Brothers of Philadelphia paid 34 cents for renner-up but the steer will go to the Stockyards Inn for their dining room.

Third place steer, a 955 pound Angus shown by Janet Frey, Marietta R.D 1, was sold for 36 cents per pound to Acme markets.

The champion and reserve last year brought 70 cents and 52 cents respectively at the sale in which Gimbles' Food Plan was the heavy buyer. In Wednesday's sale no one buyer took anywhere near of majority of the offerings

Buyers shelled out a total of $17 710 for the 61,660 lbs of beef on 65 head of steers for a sale average of $28.77 per hundredweight including the champions The steers averaged 947 pounds.

WILBUR HOSLER, MANHEIM R3 proudly exhibits "Blackjack", the steer which won reserve championship honors for him at the Garden Spot 4-H baby beef club show at the Lancaster Stockyards on Wednesday —L.F. PHOTO

MH-30—To spray or not to spray?

What does "Lancaster Farming" say about this?*

FROM WHERE WE STAND—

It appears we are on the same old merry-go-round we stepped on last year when some of us who played it straight stepped off to get our faces full of dirt.

Tobacco companies last year cautioned against the use of chemical growth inhibitors at the risk of severe price penalties for treated tobacco.

Many conscientious tobacco farmers took the companies at their word and went through the age-old chore of hand suckering, while some of their adventuresome neighbors risked price cuts for the convenience of chemical suckering.

When the buyers hit the sheds last fall, most of the tobacco was sold before the conscientious farmers had time to say, "But I suckered mine by hand."

What happened to the promised differential in price? Several farmers reported that the buyer did not even ask how the suckers were removed from the crop.

While the buying companies insist that they will not knowingly buy treated tobacco, they readily admit that treated tobacco, in many instances, does not show adverse physical effects that can be detected on the auction floor.

Tobacco bought on the auction floor is one thing, but the Lancaster county tobacco market is another.

In many cases the buyers were on the farms during the growing season, and still no premium was paid for the hand suckered crop.

If the tobacco companies intend to discriminate against the chemically treated tobacco, they made a poor start last season. There will be many more farmers willing to test them out again this year.

At least that's how it looks from where we stand.

*Reprinted from June 11, 1960 Issue

Various statements have been circulated giving a misleading impression of the U. S. Dept. of Agriculture's attitude on MH-30. Actually, the Department has refused to prejudge this chemical. It is engaged in careful, scientific review of MH-30. This will require many months.

MH-30 has been tested for over a dozen years and used in the flue-cured areas for the past 5 years, in the burley belt for over 3 years and on cigar tobacco for 3 years.

With efficient labor increasingly hard to find and costly, the farmer must rely on chemical control of plant disease, pests and weeds more than ever before. MH-30 is such a chemical. On the average it eliminates 30 costly man-hours of back-breaking hand-suckering per acre. It is very common for a single acre of tobacco to be attacked by as many as 125,000 suckers. We believe anyone who insists on pulling them by hand is fighting progress.

With unseasonable weather delaying the crops in Lancaster County, MH-30 should be of extra benefit this season. This chemical control frees the farmer from hand-suckering and allows him necessary time to catch up with his corn cultivation, haying and other chores.

THIS IS THE CHEMICAL AGE ON THE FARM.

Grasslands Chapter FFA Conducts Corn Stand Demonstration Plots

Using a corn population demonstration as its first major community project, the Grassland Chapter Future Farmers of America, located at the new Garden Spot high School, New Holland, is hopeful of aiding farmers throughout the area

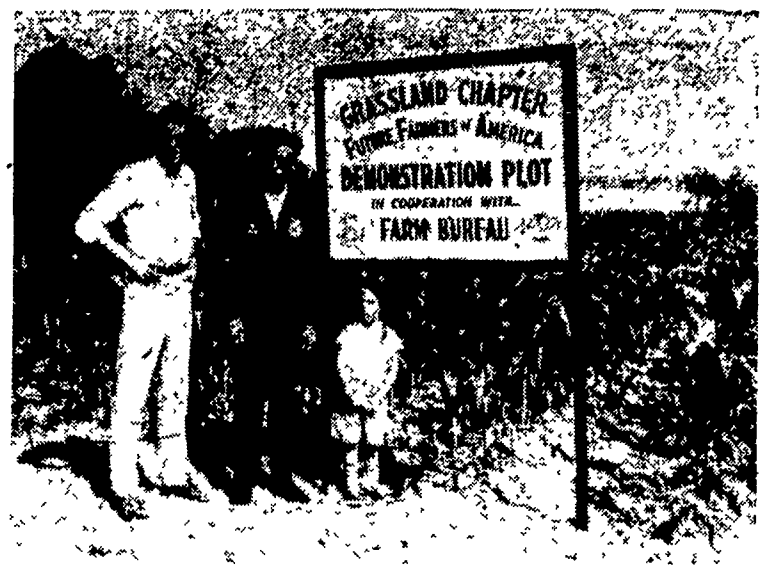
According to Robert Herr, vocational agriculture instructor at the new school, the popular practice in the New Holland district is to grow corn at the rate of 12,000 plants per acre

In this project, the chapter hopes to show the district that an increased rate of population serves as a means of more efficient and more profitable farm operation

On a four-acre tract near the heart of New Holland, Wilmer R Martin, a chapter member, has established a demonstration plot. In addition to two variety plots at the normal population Wilmer went a step further in the demonstration and has one acre of U S 13 at the rate of 12,000 plants and one acre at 16,000 plants

Wilmer, 15, a sophomore at Garden Spot High, has taken complete charge of the demonstration plot, and is doing all the work, receiving advice from the FFA chapter and the Lancaster County Farm Bureau Cooperative Association

The son of Mr and Mrs. James Martin, New Holland R1, Wilmer can boast of having one of the cleanest and more promising tracts of corn in the district



WILMER MARTIN IN THE FFA JACKET discusses the corn demonstration plots he is conducting in cooperation with the local chapter of Future Farmers of America with his teacher of vocational agriculture, Robert Herr, as brother Donnie listens in Witmer is a student at New Holland High School and a member of the Grasslands FFA chapter

Machinery Firm Plans Airlift

Six Lancaster County farm machinery dealers will be among the 4,500 John Deere dealers and salesmen airlifted into Dallas, Texas the last week in August for one of the biggest sales meetings ever staged

Sixteen United States and Canadian airlines will participate in flying the 4,500 John Deere dealers and 1500 other persons to the meeting where they will get a first hand look at the company's new line of tractors and machinery scheduled to go on sale in late September

To accomodate the crowd, the Dallas Memorial Auditorium, the Texas Fairground and the Cotton Bowl will be used for various parts of the meeting At the fairgrounds more than 230 tractors and 270 pieces of equipment will be on display

Local dealers attending the meeting are Arthur G Good, Lancaster County Industrial Sales, Inc, New Holland, A B C Groff, A B C Groff, New Holland; Elmer Landis, Landis Brothers, Manheim Pike, Lancaster; LeRoy Wenger, Wenger Implement Company, Buck, Gary Shotzberger, Shotzberger's, Elm and Alan Beyers, Alan Beyers, Christiana

Guernseys

YOUR HEALTH AND CHIROPRACTIC

By

Dr W D Sickman and Dr M W Szollose

Every patient who goes to a doctor says "Can I and will I get well?"

Most sick people have been educated, taught, trained to look for something OUTSIDE to be taken INSIDE, or something to be done OUTSIDE by another to cure their disease

They have great faith in EXTERNAL things, without giving thought to any power INSIDE They expect to lie in bed, apply heat or cold, take pills or drugs, with understanding that such from OUTSIDE will cure somesomething INSIDE

WE get sick because of something INSIDE going wrong We will get well because of something INSIDE going right!

Innate Intelligence (nature, spirit, or any other name given this INTERNAL power within us) is what cures and heals

It is impossible to predict number of adjustments any given case will require No two people are exactly alike Recovery depends on several factors

1 How much damage has been done
2 Age of patient
3 How long patient had disorder
4 Whether or not interference has been corrected and remains out
5 Patients cooperation

Chiropractic has grown on the basis of performance and results It has had to build its reputation very largely upon successful results obtained in these cases which have failed to obtain results by every other method

You owe it to yourself to investigate the tremendous worth and merit of Chiropractic as a health service

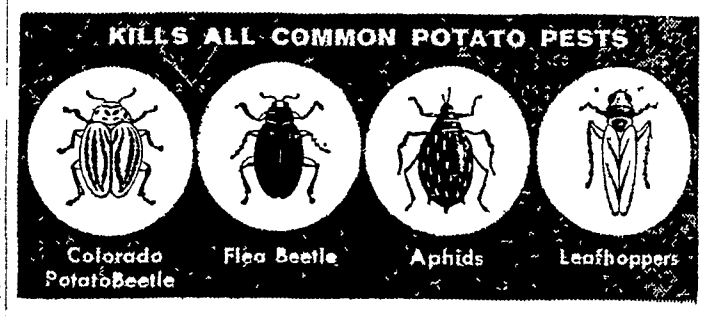
Potato Growers You Need

MILLER

Thiodan

The new broad range insecticide



With this important new chemical discovery—Thiodan—you get a multiple kill of several potato pests at the same time. This means *one shot* control which, of course, is a more economical way to protect your crop.

Thiodan is a concentrate. Just mix with water and apply with ground or air spray equipment. And Thiodan is compatible with all commonly used fungicides. Its effectiveness has been proved over several seasons.

Machinery Firm plans Field Day

Machinery valued at $100,000 will be on display at the annual International Harvester field day on August 24

Visitors to the Norman Kline farm on Route 501, one mile north of Schaeffertown, will see 14 machines with a total of 40 bottoms plowing at one time.

Following the plowing demonstration, scheduled to get underway at 10 a m , a free lunch will be served by the cooperating dealers.

During the afternoon, many of the 80 new machines on display will be used in the forage and hay making demonstration. Balers with bale thrower, field choppers of the auger blower and the direct throw type, power forage feeders, harvesters with cutter bar, row crop and pick up attachments and mowers and hay conditioners will be among the machines in action during the afternoon program

Rain date for the event is Friday, August 26 at the same farm.

● Honorary Degree

(From page 1)

ly from all the states to receive the degree, the highest award made by the Future Farmer organization

Myers, graduated from East Berlin High School in Adams County where he was a charter member in that FFA chapter, began his FFA activities there and was named the school's outstanding senior FFA member in 1941.

After graduation from the Pennsylvania State University with a B. S. degree in Agricultural Education in 1949 where he had been reporter for the collegiate chapter FFA, Myers accepted the teaching position at Lampeter - Strasburg where he has been since that time

In addition to completing work for a Master of Science degree in Agriculture Education at the University, Myers has found time to carry an active role in the local, state and national teachers organizations. He is at present the secretary-treasurer of the Pennsylvania Vocational Agriculture Teachers Association and a life member of the National Education Association.

Under his guidance, Myers has seen 45 young men earn the Keystone Farmer degree, and eight have been awarded the club's highest award, the American Farmer degree. Myers has coached five parliamentary procedure teams to regional wins and one state championship. He has seen five of his students become State FFA officers — one of them becoming State president. Myers received the Honorary Keystone Farmer Degree in 1956.

Myers served four years with the army during World War II He is at present a Major in the army active reserve.

Married to the former Gladys Stover of Louisville, Ky , he is the father of two sons, George, Jr , and Charles, and one daughter Maurine.

The degree will be presented during the national conclave in the municipal auditorium, Kansas City, Missouri.

NEW WHEAT

Redcoat, a new soft red winter wheat, will be the recommended variety for Pennsylvania farmers in '61, announces Elmer C. Pifer, extension agronomist at Penn State The Pennsylvania Foundation Seed Cooperative has 29 acres of Redcoat now which will be sold to seed growers for production of registered and/or certified seed for sale next year.

Read the Classifieds.

● Crop Summary

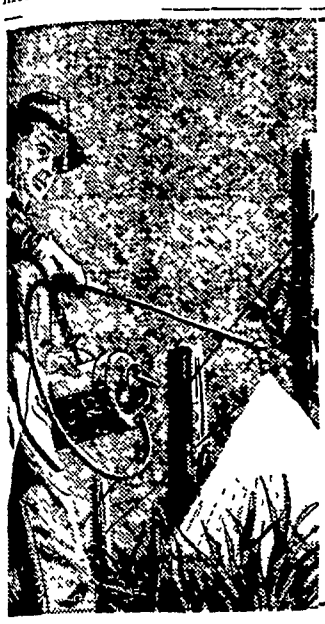
(From page 7)

mount of blight being reported It is possible that potatoes will be harvested earlier than anticipated if growing conditions remain favorable.

Above average yields are being obtained from most vegetable crops. Quality is, for the most part, higher than usual for this time in the season. Barring drastic weather changes, record high yields may be obtained from several vegetable crops.

Summer apples such as Rambo, Transparent, Duchess and Lodi varieties continue in light supply and a few Wealthy trees are about ready for harvest.

How things change! Nowadays when the doctor finds a patient in a rundown condition, he prescribes less golf and more time at the office.



FREE SAMPLE DOWPON...
Kills Quack Grass

Problem grasses choke out crops, reduce yields, make extra cultivating work! Clean up your fields with Dowpon*. It's more economical . . . more effective . . . kills grasses, roots and all . . . reduces regrowth problems. Will not injure grazing livestock if accidentally eaten. Apply in spring or fall before planting, or as a selective spray, or as spot treatment on certain crops.

2 p.m.—Public auction of 4-H pig club show entries.

All day—Union county farmers tour in the Elizabethtown-Mt Joy area.

Aug. 25—First day of the Southeastern Pennsylvania District Hay show at the Hershey Arena.

Aug. 26 — 10 a.m. - Northeastern Hay Driers Association meets at the Masonic Home Farms, Elizabethtown.

6:30 p.m.—Farm Equipment Dealers' annual picnic at New Holland Community Park.

Aug. 27—1 p.m. - First County-wide 4-H horse club roundup at the Paul Martin Sales Barn, Blue Ball.

Aug. 29—7:45 p.m. - Meeting in the Gap fire hall. Natural Fertilizer and the soil will be the subject of Professor William H. Eyster, world famous bioligist.

Cold milk is a refreshing and nourishing thirst quencher or snack. For variation, try some fruit flavoring, chocolate or other flavorings.

● Conservation

(From page 1)

this week.

Agencies presenting demonstrations or exhibits include Soil Conservation Service, Game Commission, Fish Commission, Forestry Service, Highway Department, Agricultural Stabilization & Conservation Committee, Vocational Agriculture, Extension Service, and Production Credit, Cooverative Association.

"We extend a cordial invitation to all farmers to attend this first conservation field day and become better acquainted with this very important topic." Gingerich said.

Lunch will be available on the farm from a local church group.

Still your best crib buy

NOW $319.50

(F.O.B. Stock Points)

Over 1200 bu. capacity—means 1st year storage at less than 25¢ per bu.

EXCLUSIVE SPEEDY RAFTERS MAKE SPEEDY CORN CRIBS

Twice as Fast twice as easy to erect

Speedy roof rafters guarantee easy, proper placement of roof panels the first time. Rafters add great strength to the roof. Panels need only to be bolted together in three places. It's another big time-saving feature you get only in Speedy Bar-Lok corn cribs.

Stands up best—lasts longer
Wire mesh panels are 5-gauge wire — thick as a ¼" bolt! No bulge or sag. Sturdy 26-gauge galvanized roof is securely anchored to 9 steel roof rafters and side panels. Can't blow off!

Come in today and see the Speedy Bar-Lok corn crib. Let us prove to you that Speedy is twice as fast — twice as easy to erect. Let us show you all the other features that make Speedy Bar-Lok your best corn crib buy.

COWS PROPERLY CONDITIONED ...during the dry period PRODUCE UP TO 25% MORE MILK!

BEFORE CALVING This cow was fitted on the Pioneer program for 60 days before calving. Note the excellent "dry cow" body condition.

AFTER COMPLETING RECORD The same cow after having produced 23,044 lbs. of milk and 941 lbs of fat as a 4 year old. Note the extreme dairyness and exceptional body condition shown after this cow produced 11½ tons of milk!

600 pounds of PIONEER DRY and FRESHENING yields an extra TON OF MILK!

Proper feeding of the dry cow is the most important single factor affecting herd health, longevity, and a sustained high level of milk production. In 60 days, while the cow is dry, Pioneer Dry and Freshening feed will repair the body from the previous lactation, build a reserve of body condition for the next lactation, and develop a stronger calf. In addition your cows will have less calving difficulties, eliminate placenta quickly, have less udder congestion, and *most importantly they will produce up to 25% more milk!*

See us today for full particulars.

ANY DAIRY FARMER

that reads this ad and is interested in putting on a few good Wisconsin milk cows to step up your milk production, please drop us a card right away giving your name, location and telephone number and we will contact you right away at your farm.

Look your herd over and check them over closely and cull out your beef to make room for good cows We have a very good market for your culls and any kind of beef cows that you might want to trade. We are receiving 2 to 5 trailer loads a week from Wisconsin. Delivery can be arranged for most anywhere in Pennsylvania right to your farm. If you would prefer to take a drive over to our cattle farms, take the Penna. Turnpike which leads on to the N. J. Turnpike then get off at N. J Exit no. 5, turn right towards Mount Holly, and stop at first gas station and telephone us and our fieldman will come and lead you over to our cattle farms Our cattle farms are located on each side of Highway 206, 1½ miles this side of Vincentown, N J or about 6 miles from N J Turnpike Exit no. 5 Look for eight silos, 4 silos on each side of highway, also telephone us the night before for an appointment to meet us
